

NIKHIL SR

+91 9900527021 — Tumkur, Karnataka

srnikhil25@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Summary

Information Science Engineering graduate with practical experience in software development using Java, C/C++, Python, React Native, Firebase, and REST APIs. Strong foundation in Object-Oriented Programming, Data Structures, DBMS, and full-stack development. Passionate about learning Salesforce technologies and building scalable enterprise and CRM solutions while continuously expanding technical expertise.

Education

Dr. Ambedkar Institute of Technology, Bengaluru	2022 – 2026
B.E. Information Science and Engineering	CGPA: 8.03/10
The Presidency PU College	2020 – 2022
PCMB (KSEEB)	89.17%
The Presidency Public School	2019 – 2020
ICSE	88.83%

Technical Skills

Programming Languages: Java, C/C++, Python, JavaScript, TypeScript

Frameworks: React, React Native, Firebase, Django

Web: HTML, CSS

Database: MySQL, Cloud Firestore

Developer Tools: Git, GitHub, VS Code, Postman

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs

Projects

Krishi-Mitra — AI-Powered Smart Farming Application [GitHub](#) May 2025 – Aug 2025

Tech Stack: React Native, Firebase, TypeScript, Gemini API, Weather API, REST APIs

- Developed an AI-powered smart farming application using React Native and Firebase to provide intelligent agricultural assistance.
- Integrated Gemini AI chatbot and Weather API to deliver real-time crop recommendations and weather-based farming insights.
- Implemented Firebase Authentication, Cloud Firestore and REST APIs for secure authentication and scalable cloud-based data management.
- Designed an intuitive and responsive user interface to improve usability and provide a seamless experience for farmers across Android devices.

Veloria-AI — AI-Powered Healthcare Recovery Application [GitHub](#) Apr 2025

Tech Stack: React Native, Firebase, TypeScript, REST APIs

- Built a cross-platform healthcare application for post-surgery patient monitoring using React Native.
- Integrated AI-powered wound analysis and chatbot services through REST APIs to assist patients during recovery.
- Implemented Firebase Authentication and Cloud Firestore for secure login and real-time health record management.
- Designed a user-friendly mobile interface focused on accessibility, smooth navigation and efficient patient interaction.

Achievements

- Solved **100+** Data Structures and Algorithms problems on GeeksforGeeks, strengthening algorithmic thinking and problem-solving skills.
- Participated in the **COLOSSUS 2.0** 24-Hour Hackathon by developing **Veloria-AI**, an AI-powered healthcare application.

Certifications

- Generative AI Course – GeeksforGeeks
- Web Development Internship – Edutainer
